THE PRESIDENT'S COMMITTEE  
ON SCIENTISTS AND ENGINEERS  
Washington, D. C.

ADD!

December 23, 1958

Dear Sir:

Our book, The Scientific Revolution: Challenge and Promise, for which you have written a chapter, is now being printed and I am hopeful that copies will be available around the end of January. It is, I think, a distinguished contribution to the literature on this subject, and I am sure you will be pleased with it.

Several complimentary copies of the book will be sent to you by the publisher. I also understand that he will make additional copies available to you at a generous discount.

Since the President's Committee will be dissolved on December 31, all further correspondence should be sent to Maurice Schnapper, Public Affairs Press, 419 New Jersey Avenue, S.E., Washington, D. C. If you wish to contact me, I can be reached after January 1 at the Office of Education, Department of Health, Education, and Welfare, Washington 25, D. C.

Putting together a book of this size, involving as it does thirty-two different authors, inevitably offered some difficulties. But the task has been a delight for me, largely because of your excellent cooperation. I am very grateful.

Sincerely,

Gerald W. Elbers
